## B.2 Supplemental First Aid Supplies for Consideration – Applicable Environments

It is recognized that each work environment is unique and it is expected that a first aid kit containing the minimum required first aid supplies will be augmented with additional items or additional quantities of required supplies based upon the specific hazards existing in a workplace environment. The selection of such items should be based on the recommendation and consultation of a person competent in first aid and cognizant of the hazards and on the number of people found in the workplace. Federal, state and local requirements should be consulted, where appropriate. Augment kits with the following first aid supplies, as applicable:

<b>FIRST AID SUPPLY</b>	<b>PURPOSE</b>
Low dose aspirin	Used to treat suspected heart attack
Hemostatic agent	For individuals with compromised clotting or uncontrollable bleeding
Electrolyte replacement	Heat-stress related injuries
Glucose replacement	Diabetic or hypoglycemic episodes
Analgesics (oral and/or topical)/anti-inflammatory	Pain management; swelling control
Hydrocortisone	Itchiness and skin-related reactions including rashes
Antihistamine	Allergic reactions
Foil blanket	Treat shock and/or cold-stress related injuries
